IIST Library is organising a

"Virtual Training Session on DrillBit"

10 DECEMBER **2025**

2:30 PM TO **3:30 PM**

DrillBit is a cloud-based plagiarism detection software designed primarily for educational institutions and individual users to uphold academic integrity. Developed by DrillBit SoftTech, an Indian startup, the tool compares submitted text against a vast database of over 100 billion web pages, academic journals, conference papers, theses, and institutional repositories. It provides users with a detailed similarity report, including a percentage score, color-coded grades, and identified sources. DrillBit is empaneled with AICTE NEAT 3.0 and the UGC/INFLIBNET ShodhShuddhi Programme, and offers key features such as grammar checking, multilingual support, and integration with Learning Management Systems.
